

WOVEN HEART
(Paper or Fabric)

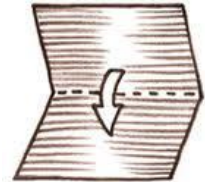

The WOVEN HEART is a very interesting project. The weaving process can be a little tricky and takes some nimble fingers – but the result is worth the effort.

Supplies needed: 2 colors of paper, scissors, and ruler.

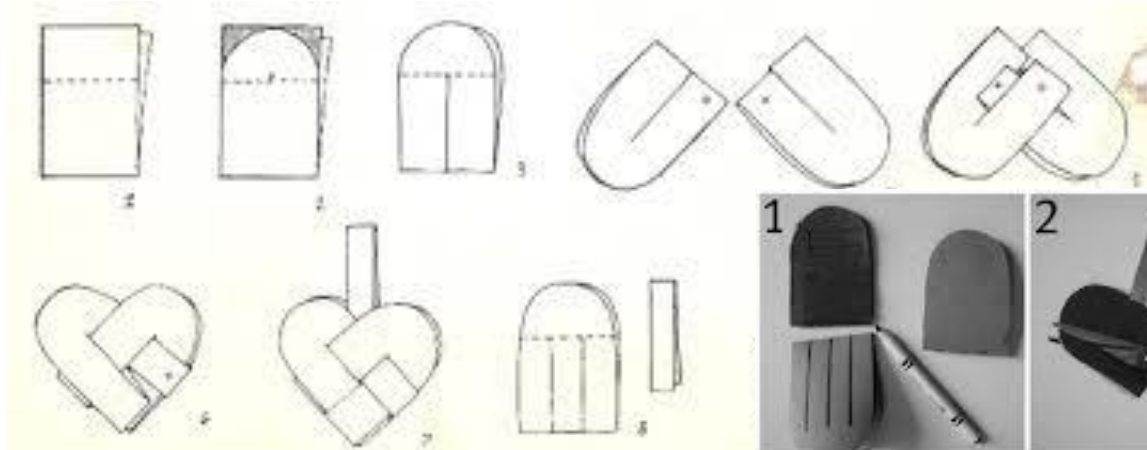

You can GOOGLE: “PAPER WOVEN HEARTS” for more images:

1) Select two colors of paper to use for your heart project.

2) Fold the paper “Hamburger” style mid-way across the short side of the paper.

3) You can make the heart “Big” or “Small” but you need to find a size that is proportional and works: **A good size is 8 cm wide x 13 cm long.**

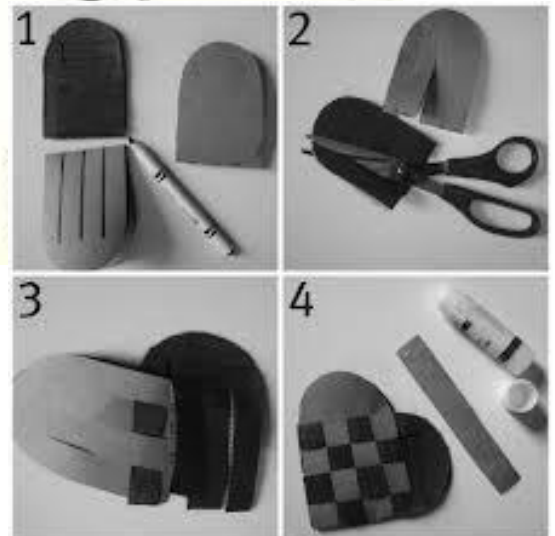

4) Cut the

“rounded” top starting at 9 cm from the bottom of the fold.

The “OPEN” edge is the top of the circle.

5) This picture shows 1 cut to learn the process of weaving.

The more cuts, the more complicated the weaving process. The size of the strips should be equal for a symmetric design (but not required).

6) When cutting the “strips”, you want to go up a little further up than the “width”.

**If you don’t cut the strips far enough,
you won’t be able to weave the pieces together nicely!**
